SUMMARY:

I have been working as a master plumber, project manager, and design engineer for the past 22 years. I began working with a plumbing and heating company in 1999, served my apprenticeship, journeyman license, and master plumber license. I then moved to McMahon Associates in Neenah, WI in 2015. The job duties that I've performed includes full building plumbing calculations, water and wastewater systems design, engineering, coordination, construction services, facility studies, cost estimating, and project management from conceptual design through construction. I have performed these duties in very diverse types of buildings and institutions throughout the years including, Educational, Health Care, Commercial, Municipal, Industrial, and Government. Below I have provided a brief listing of projects that I have worked on throughout the years.
