### SUMMARY:

I am a well-rounded engineer with over 17 years of experience in the building construction industry, specializing in power distribution, lighting, and emergency systems. Working as an Electrical Engineer the last 15 years, I have designed and specified electrical systems for hospitals, educational, governmental, industrial, laboratories, and various corporate/commercial facilities. I began my engineering career working for Gage Consulting Engineers (now TLC Solutions) out of Oak Brook, IL, before moving up moving up to Wisconsin with my family in 2015. After working with McMahon out of Neenah, WI for almost two years, I started Vaccaro Consulting, LLC and then went on to form Fox Valley MEP in Oshkosh in 2021. I am currently licensed in multiple states as a Professional Engineer and have an active NCEES Records account in which to gain licensure in other states. In addition to my engineering services and talents, I am proficient in AutoCAD and Revit and can provide BIM Coordination with the MEPFP trades.
